 **Cover while you are away**

A colleague decides on your behalf, only where the capability allows it and only within your data scope. Both names are recorded.

Hand over my reviews

Capabilities

3. Capabilities

Every use case on the platform: what it is for, who owns and reviews it, its team groups.

Capabilities

Each capability is a versioned manifest over onboarded connectors — no code per use case.

Break investigation

version 4

Owner

Reviewer

Investigate breaks a reconciliation system has already found — explain each, settle what the playbook can, check timing and other sources, a controller signs off.

One Break run per book × cob · items are breaks

Configured by [FOBO Prime — MB Rec breaks](#) [FOBO Rates — MB Rec breaks](#)

19 steps, then people review

Break investigation (skill session)

version 2

Owner

Reviewer

FOBO's skill run as one model session per book and COB, with MB Rec, MOTIF and CATS tools; a controller signs off every break.

One Break run per book × cob · items are breaks

One skill session, then people review

Complaint handling

version 1

Owner

Complaints triaged per entity and day — account timeline, related complaints, the 8-week final-response clock, fees recomputed from the tariff, acknowledgements sent after approval, redress above the limit reserved for the lead.

One Complaints day per entity × date · items are complaints

15 steps, then people review

Control operating test

version 1

Owner

A control's operating-effectiveness test — a reproducible sample, one child test case per sampled item, outcomes rolled up, the control owner's attestation and a report.

One Control test per entity × date · items are sampled items

12 steps, then people review

Control test — one sample

version 1

Owner

One sampled item's control test, opened by the operating-effectiveness test; each attribute performed and evidenced, signed off by a tester.

One Sample test per entity × date × item_ref · items are attributes

7 steps, then people review

Month-end accruals

version 1

Owner

Reviewer

Goods received but not invoiced, accrued per account at month-end — period checked, balanced journals proposed, approved within delegated authority, posted to the ledger after release.

One Accruals run per entity × period · items are purchase order lines

14 steps, then people review

Accruals review

version 1

Owner

Reviewer

P&L variance commentary

version 6

Owner

Reviewer

3. Capabilities · part 2 of 2

Month-end review of material accrual movements against plan, explained from journals; release reversals after sign-off.

One Accruals per entity × period · items are accrual lines
8 steps, then people review

Month-end commentary on material variances to budget, per entity.

One Lane per entity × period · items are variance lines
9 steps, then people review

Payment exceptions

version 2

Owner Reviewer

Daily triage of payment returns, rejects and repairs per entity — duplicates and tests set aside, amounts in GBP, ageing against the service level, the team's risk score, a proposed action per reason, Payments Operations decides.

One Exceptions run per entity × date · items are exceptions
14 steps, then people review

Reconciliation investigation

version 5

Owner Reviewer

Match two systems, explain every break, sign off. Each rec group configures its own sources, keys, tolerances, rules and reviewers.

One Rec run per entity × date · items are breaks

Configured by **Cash — bank vs ledger** **CATS vs MOTIF — Prime (FOBO)**

CATS vs MOTIF — Rates (FOBO)

10 steps, then people review

Report validation

version 4

Owner Reviewer

Check a management report (Excel) against the general ledger, explain every difference, sign off, publish a PDF validation report.

One Validation per entity × period × report · items are report lines
8 steps, then people review

4. A capability: its cases

Cases open on their own (event or schedule); open one by hand with “Open a break run”.

The screenshot shows a web application interface for 'Break investigation'. On the left is a dark blue sidebar with icons for various functions. The top right corner features a notification bell with a red '1', a refresh icon, and a user profile for 'Erin' with the role 'Cash operations'. The main content area has a light blue header with the title 'Break investigation' and a descriptive paragraph: 'Investigate breaks a reconciliation system has already found — explain each, settle what the playbook can, check timing and other sources, a controller signs off. · break.investigation v4'. Below this, it says '19 steps · stops for a person before reason and review · [see the workflow](#)'. A horizontal tab bar contains 'Cases' (selected), 'Groups', 'Configure', 'Flow', 'Evals', and 'Versions'. The 'Cases' section shows a header 'Cases' with a dropdown menu set to 'All groups' and a button '+ Open a break run'. The main area is empty with the text 'No cases yet.'. Below this is a 'Recurring' section with a header 'Recurring' and a message 'Nothing has come back more than once in recent runs.'. The final section is 'Learning from the work', which includes three bullet points: 'NOTHING EXPLAINED THESE' (Every item in recent runs was explained by a check, a rule or the model.), 'CHECKS THE DECISIONS SUGGEST' (Not enough approved judgement calls with different verdicts yet to learn a condition from.), and 'COULD BE A RULE' (No model proposal has been approved unchanged often enough yet.).

AGENT ONE FINANCE

Investigate each break for book PRIME-SIM-01, COB 2026-10-09, following the FOBO skill.

MODEL · turn 1

Step 0: confirm processing is complete (R5).

MODEL · turn 1

calls mbrec.book_status (cob: 2026-10-09, book: PRIME-SIM-01)

TOOL (THROUGH THE GATEWAY) · turn 1

returned 1 row(s) · mbrec.book_status

MODEL · turn 2

Step 1: establish the break universe.

MODEL · turn 2

calls mbrec.breaks (cob: 2026-10-09, book: PRIME-SIM-01)

TOOL (THROUGH THE GATEWAY) · turn 2

returned 8 row(s) · mbrec.breaks

MODEL · turn 3

Step 2-3: read the FO and BO PnL components for the book.

19. Case: the model session · part 2 of 3

1 break(s) **CORRECT AND REPOST** model (fobo-skill-simulator)

Break XYZ STRUCT NOTE Proposed

1 break(s) **DO NOT POST** model (fobo-skill-simulator)

MODEL · turn 3
calls **cats.pnl_components** (cob: 2026-10-09, book: PRIME-SIM-01)

TOOL (THROUGH THE GATEWAY) · turn 3
returned 8 row(s) · cats.pnl_components

MODEL · turn 3
calls **motif.pnl_components** (cob: 2026-10-09, book: PRIME-SIM-01)

TOOL (THROUGH THE GATEWAY) · turn 3
returned 8 row(s) · motif.pnl_components

MODEL · turn 4
EMB AMORT 2031: validating front office first (R2).

MODEL · turn 4
calls **secref.corporate_actions** (cob: 2026-10-09, instrument: EMB AMORT 2031)

TOOL (THROUGH THE GATEWAY) · turn 4
returned 1 row(s) · secref.corporate_actions

MODEL · turn 5
EMB AMORT 2031: Redemption break, DO NOT POST.

MODEL · turn 6
GILT 4.25 2045: validating front office first (R2).

MODEL · turn 7
GILT 4.25 2045: Price break, DO NOT POST.

MODEL · turn 8
UST 2.5 2029: validating front office first (R2).

MODEL · turn 9
UST 2.5 2029: front office passes; validating back office.

MODEL · turn 10
UST 2.5 2029: Posting failure (§8), CORRECT & RE-POST.

MODEL · turn 10
calls **secref.bond_metadata** (instrument: XYZ STRUCT NOTE)

TOOL (THROUGH THE GATEWAY) · turn 10
returned 1 row(s) · secref.bond_metadata

MODEL · turn 11
XYZ STRUCT NOTE: Data quality break, DO NOT POST.

MODEL · turn 11
calls **mbrec.break_history** (cob: 2026-10-09, book: PRIME-SIM-01, instrument: BUND 0 2030)

TOOL (THROUGH THE GATEWAY) · turn 11
returned 1 row(s) · mbrec.break_history

MODEL · turn 12
BUND 0 2030: Reapplication (§8), POST.

MODEL · turn 13
IRS 7Y GBP: validating front office first (R2).

MODEL · turn 14
IRS 7Y GBP: front office passes; validating back office.

MODEL · turn 15
IRS 7Y GBP: Settlement break, POST.

MODEL · turn 16
ARG 2035: validating front office first (R2).

MODEL · turn 16
calls **secref.corporate_actions** (cob: 2026-10-09, instrument: ARG 2035)

TOOL (THROUGH THE GATEWAY) · turn 16
returned 1 row(s) · secref.corporate_actions

MODEL · turn 17
ARG 2035: Corporate action break, ESCALATE.

MODEL · turn 18
CORP 5.1 2028: validating front office first (R2).

MODEL · turn 19
CORP 5.1 2028: front office passes; validating back office.

MODEL · turn 20
CORP 5.1 2028: FO and BO both pass, the break persists — trade-level investigation (§7).

MODEL · turn 20
calls **cats.trades** (cob: 2026-10-09, book: PRIME-SIM-01, instrument: CORP 5.1 2028)

TOOL (THROUGH THE GATEWAY) · turn 20
returned 1 row(s) · cats.trades

MODEL · turn 20
calls **motif.trades** (cob: 2026-10-09, book: PRIME-SIM-01, instrument: CORP 5.1 2028)

TOOL (THROUGH THE GATEWAY) · turn 20
returned 1 row(s) · motif.trades

MODEL · turn 21
CORP 5.1 2028: Trade booking break, POST.

MODEL · turn 21
8 breaks in PRIME-SIM-01: 1 CORRECT & RE-POST, 3 DO NOT POST, 1 ESCALATE, 3 POST.

20. Case: ask about it

Questions in plain words, answered from the case's data and its read tools; every lookup audited.

Building and running

22. Authoring

A new capability by answering questions, from a BRD, or from a template; another owner approves it.

Authoring

Answer a few questions, describe the work for the model, or start from a template. The platform checks it; another owner approves it.

How do you want to start?

☒ Answer questions
no model needed

☐ Describe it (BRD)
no model connected

☐ Start from a template
edit it after

Name

Equities breaks

What it is for

What kind of work

☒ Investigate what another system found
e.g. MB Rec's breaks: no matching, Agent One Finance explains each one

☐ Match two systems
e.g. bank vs ledger: Agent One Finance matches, then explains what does not match

☐ Explain variances
e.g. actual vs budget: what is material gets commentary

☐ Review a list
e.g. attestations or exceptions, one decision per group

One case is one... (key fields)

book, cob

Who sees a case is limited by

no data scope

A case is called

Run

An item is called

Item

Items come from

Choose a connector tool...

Item id field

instrument

Amount field

difference

Unit

GBP

☐ Threshold not confirmed yet

Draft manifest

Answer the questions, draft from a BRD, or pick a template to see the configuration here.

Group items by	Columns reviewers see
break_type	instrument, desk, difference

What rules cannot settle goes to

☒ the model, then a person ☐ a person (no model)

Tools the model may read:

None chosen.

Instructions to the model (optional)

☐ A person approves the work before the model is asked (tollgate)

Reviewers (roles)	Owners (role, optional)
FOBO_CONTROLLER	

A case opens

 ☐ Re-check each decision on the next cob

Who reviewers may ask for evidence (one per line: Name: ROLE)

Desk (trader): EQ_DESK

Operations: OPS

Sign-off checklist (one question per line)

Is the root cause evidenced?

Controls (optional)

Review a random sample of	Service level (hours)
all items	none

Who may approve how much: the bank's authority system

 ...or two different approvers from (amount)

Decisions reserved for (roles)

CREDIT_OFFICER

⌵ Build the capability

Whichever way you start, the result is checked by the platform, can be edited here or in Configure, and goes live only when another owner approves it.

Drafts awaiting approval

No drafts waiting.

Promote from another environment

Paste a version exported from another environment (its Versions tab, download icon). It arrives as a draft and goes live only when an owner here approves it. Its checksum (and signature, when this deployment has a promotion key) is verified.

Import as draft
